

1

PROVENANCE TAGGING

Chunks are tagged user, workspace-file, web or tool-result.
Only user chunks may originate an intent.

2

PLAN, NOT PROSE, IS THE INTERFACE

A tool call must be a well-formed declaration; document text cannot become one by being persuasive.

3

POLICY IS OUT-OF-BAND

The Policy Engine reads the ToolCall, never the reasoning text.
Nothing in a document can change a verdict.

4

THE USER IS THE LAST GATE

Every outward action shows a concrete preview: recipient, content, destination.

5

BOUNDS SHRINK THE BLAST RADIUS

Even a fully successful injection is confined to one workspace, cannot delete, and cannot exceed its egress policy.
